## **ADVANCED 4X4 TURBOCHARGER SYSTEMS**

**To suit the Nissan QD32 four cylinder engine  
Worldwide - Navara 3.2 litre diesel**

THIS TURBO SYSTEM IS DESIGNED TO INTEGRATE WITH THE  
STANDARD ENGINE AND IMPROVE POWER AND TORQUE  
BY UP TO 50% COMPLETE SYSTEM

In order to provide maximum durability under heavy load conditions,  
this kit features :

- Custom built water cooled turbocharger
- Fully annealed ductile iron 2-piece exhaust manifold
- Mandrel bend exhaust pipe, bolting to stock system
- Braided stainless steel, Teflon lined water and oil lines
- Stainless steel hardware (clamps, studs, etc.)
- Cast alloy air ducts

The heart of the AXT Turbocharger System is a custom built Garrett-based water-cooled turbocharger designed and manufactured by Allied Signal, utilising the technological resources of Aerospace and Engineered Materials. Garrett turbochargers are used worldwide in aircraft manufacture, shipping and earth moving equipment as well as automotive. They are widely regarded as the finest turbocharger in the world today.
